NEW TECHNOLOGY IN EDUCATION 2015
CONFERENCE THEMES

THE CONFERENCE WILL COVER THREE GENERAL THEMES.

HERE IS A LIST OF SUGGESTED TOPICS IN EACH OF THE THREE THEMES TO INSPIRE YOU WHEN APPLYING TO BE A PRESENTER AT THE EVENT.

THEME 1: Best practice examples of the use of new technologies in the primary and secondary schools

SUGGESTED TOPICS

1. The availability of computers in teaching - examples of the use of computer cabinets, where there is a computer for every child or the use of various devices (where everyone brings their own device); The advantages and disadvantages;

2. The development and use of digital content in teaching activities - working in classroom, and the use of working tools in an online environment;

3. Distance learning and its systematic application (e.g. when in need of a teacher from a particular field, in case of student illness, when students live in remote or hard-to-reach villages - like mountain villages or islands);

4. The new role of school libraries in strengthening the information and digital literacy;

5. Principals' point of view – the role of ICT in effective school management – experience with electronic grade books and professional development of teachers and principals (the challenges related to teachers' and principals' ICT competencies).

THEME 2: Best practice examples of the use of new technologies in higher education: internationalisation of higher education

SUGGESTED TOPICS

1. Strategic use of technology in the internationalisation of higher education;

2. European directions, standards and indicators that contribute to internationalisation;

3. The role of technology in promoting Serbia as an academic destination;

4. Professional development of academic staff in higher education in the field of ICT;

5. Technology and new methods of organising teaching and learning;

6. Virtual teacher and student mobility;

7. Development of study programs and digital learning;

8. Open access and open educational resources;

9. Technology and the implications on the cost structure;

10. The fight against plagiarism at university using specialised software.

THEME 3: Best practice examples of the use of new technologies in inclusive education

SUGGESTED TOPICS

1. Using ICT in inclusive education (e.g. in dealing with the physical and sensorimotor disabilities, dyslexia, dyscalculia, dysgraphia, speech impediments, loss of hearing and vision, communication difficulties, emotional and behavioural disorders);

2. Development of the methodology of teaching subjects so that it promotes inclusive education;

3. Use of and/or development of software for inclusive education;

4. Use of and/or development of assistive technologies;

5. Development of human and technical resources in schools in order to improve inclusive education;

6. Physical and web accessibility in the service of inclusive education (standards, guides, models, etc.)
